GMW Architects

United Kingdom & Qatar

DTZ, 125 Old Broad Street, London Concept design for the client-facing and staff breakout areas of DTZ's showcase London offices.

Discovery House, Chiswick Park, London Office fit out for a cable TV company and one of ten similar projects undertaken across Europe as part of a framework appointment.

Foreign & Commonwealth Office, Hanslope Park New offices and IT network infrastructure for 400 FCO staff on a campus site in Buckinghamshire.

GMW Mimarlik

Turkey

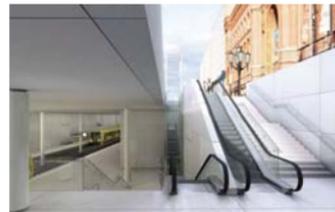

Riga Airport International Terminal, Latvia The modular curvilinear form provides a flexible and adaptable framework capable of responding to future changes and expansion. The master plan includes a complex which consists of a 20,000m² office block, a 300-room hotel and shopping facilities, as well as a train station complex with offices above.

Silvi mixed use development, Istanbul Containing a 4-star city hotel, offices, retail and residential space, the development is located in one of Istanbul's most important and active residential, retail and business precincts. The design responds to this diversity of function, scale, mass and typology through its planning, articulation and materials.

Collignon Architektur

Germany

Underground train station, City Hall, Berlin This station is on a new underground line and is right in front of City Hall near Alexanderplatz, one of Berlin's hotspots. Totalling 10,000m² of gross floor area, the station connects inside and outside to provide light, fresh air and easily understandable orientation. Completion 2015.

Revitalisation project: Office building Feldbergstrasse 35, Frankfurt am Main An award-winning project with a total of 8,000m² gross floor area. To maximise the usability and sharpen the character of the building, newly developed air conditioning units with a digital slit pattern were introduced into the façade design. Completion 2009.

CERAU

Belgium

Dinant Law Courts – Finance Building, Cerau (in association). The building is monumental in its dimensions and powerful in the expression of the four, copper-covered courtrooms. At the same time, it is transparent, friendly and reassuring, with accessibility, the design of the public spaces and circulation having been particularly studied for this project.

Sibela New warehouse and office building in Brussels designed to a passive energy concept.

KLab architecture

Greece

Cubic Distortion House A re-conceptualization of the traditional Greek house, whose irregular stonework generates its fractured facade. The formal mass of the 500m² house has evolved from a simple cube distorted to allow a glimpse of views and sunlight that would otherwise have been inaccessible.

Green Pavilion for Expo 2010 in Shanghai - A competition entry inspired by the multilayered reality of Greece today, but rooted in a city's collective memory. The pavilion's shell mirrors the tents and canopies found at archaeological excavations, forming a vast protective 'mantle' which is lifted to reveal what lies within.

Placebo Pharmacy The design process for this large (600m²) supralocal pharmacy forced us to a virtual building—a placebo pharmacy. The existing structure was re-formed into a cylinder to create a spiral that seeks to converse with the rapid motion on Voulaermis Avenue, the urban artery on which the building stands. The panels of the façade are perforated using Braille, which both alludes to the system's use on pharmaceutical packaging and allowing light to find its way through.

IMB Asymetria Architects

Poland

Lubicz Brewery, Krakow A mixed-use complex of luxury apartments, retail and offices, where historical brewery buildings were incorporated into a new development.

Aquapark, Koszalin Water park complex containing a sport's zone with full size olympic pool, leisure & fitness zone, hotel with SPA and conference centre.

Kazimierz office building, Krakow Located along the Vistula river bank, offering 15,000 m² of A class office space and underground parking for 200 cars.

Feldbergstraße 35, Frankfurt a.M. Collignon Architektur

European Architects' Alliance

The European Architects' Alliance is a consortium of architectural and design firms founded on the principle of mutually beneficial co-operation. With more than 20 offices across Europe and 650+ staff, the Alliance brings international experience and local knowledge to projects across a wide range of sectors. EAA members have been collaborating on a variety of projects for international clients and currently have commissions for the FCO, Discovery Channel, Société Générale, Gen Re and Vodafone, to name a few.

Understanding the client, sharing knowledge and concurrent design are our priorities, with best-value targets and continuous improvement as the motors to increase product value. Non-adversarial contracts form the basis for success. The EAA is ideally placed to provide architectural and design services for clients whose requirements transcend national boundaries and offers particular advantages to multi-national firms pursuing global roll-out development programmes.

Healthcare: Children's Hospital of Ireland Indicative design showing the design approach by Murray O'Loaire / O'Connell Mahon and NBB.

Horiba A 7500m² building for the Japanese group Horiba, providing offices, laboratories and cleanrooms in the heart of the European scientepole of Sclay.

Unheated multi arena Curved steel rafters and a light membrane allow daylight through. Large gates facilitate a variety of applications.

Bancolombia HQ, Medellin, for Colombia's largest bank and winner of several awards, including Interior Design Magazine's 'Best of Year' 2009.

Callegro in Zadar Croatia, shopping centre and cinemas.

FM Arquitectos, Madrid The practice's own offices.

Protontherapy Center, Trento Hospital The design promotes confidence and wellness, through the use of traditional, natural and ecofriendly materials.

Infrastructure: Dublin Airport Terminal One Extension Phased design development, management and construction of an ADR designed two-storey extension elevated on columns.

Education: Clongowes Wood College S.J. Co Kildare New-build science, technology & art building and multi-purpose sports centre.

Urban design: George's Quay & environs, Dublin Detailed urban design study to identify the optimum location for a proposed high intensity cluster.

SERAU architectes et ingénieurs associés

France

Bois d'Arcy 26,000m² industrial building for La Poste in south west Paris. The timber boarding façade responds to the nearby environment.

EADS A 32,500m² industrial building for the French aviation firm EADS in western Paris. This building includes offices, laboratories and clean rooms (5,000m²).

Urban design: George's Quay & environs, Dublin Detailed urban design study to identify the optimum location for a proposed high intensity cluster.

DesignGroup Architects

Denmark

CPH Airport - T2 Transit An extension to the existing Terminal 2 in collaboration with GMW Architects. It includes an enlarged retail area, optimized circulation and improved access to the second floor.

Berlingske Karré Total renovation and reconstruction of office area with the ground floor converted for retail.

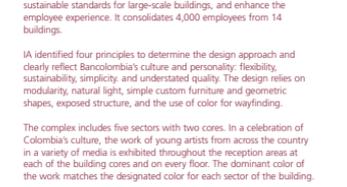

Vesterfælledvej 6 A new office building that adapts to its surroundings and visualizes a city dynamic.

IA Interior Architects

United Kingdom United States

The 73,000m² state-of-the-art facility was designed from the ground up to accommodate workplace function and flexibility, set new sustainable standards for large-scale buildings, and enhance the employee experience. It consolidates 4,000 employees from 14 buildings.

IA identified four principles to determine the design approach and clearly reflect Bancolombia's culture and personality: flexibility, sustainability, simplicity, and understated quality. The design relies on modularity, natural light, simple custom furniture and geometric shapes, exposed structure, and the use of color for wayfinding.

The complex includes five sectors with two cores. In a celebration of Colombia's culture, the work of young artists from across the country in a variety of media is exhibited throughout the reception areas at each of the building cores and on every floor. The dominant color of the work matches the designated color for each sector of the building.

Tomislav Cop Architects

Croatia

Mixed-use project in Zagreb, containing a 4-star hotel and serviced apartments.

This cultural centre in Zagreb contains a museum, library and multi-purpose hall, together with ancillary facilities. The building utilizes both solar and wind power in its 'green' environmental strategy.
